        i. Matt Blue: Is this something that can be added to best practices task force?
            1. Wendi: Best practices task force isn't going to look at that level of specific details – but does fall into equity and caseloads, etc.
            2. Should this be a new movement?
            3. Discussions about AI in advising
    d. Advising Institute Canvas Page Usability – skipping for committee updates

VII. Committee Updates
    a. Assessment – has covered a few topics:
        i. Graduate – least priority that assessment is working on

        ii.   NESSE

        iii. Coming up with questions – post appointment questionnaire. What to do with data

  b. Technology – working diligently on best practices for CS advising notes. Also talking about class search, add more filters to fluid search

  c. Teacher Education – Troy sent out CTE sent out new content exam rules: students will be required to attempt the content exam as part of gateway 1 but do not have to pass it to student teach – would need override

  d. PDT – Meeting next Wednesday. Sessions are scheduled. Trying to work on calendaring and not conflicting with other AAC events.

  e. Mentoring & Connections – poor attendance at last event, but more events coming up

VIII.   Student Representative Report – Students are still upset with how packed the university is—hasn't gotten worse or better, just staying the same. Many parents are posting in the parents' page, upset and up in arms. Many students blaming ISU for what happened over homecoming. Students upset about not getting classes they want due to low class sizes and them filling up.
