

AAAC Technology Subcommittee

Thursday, April 15, 2010 Minutes

Members Present: Mary Leung, Jody Decremer, Deanna Deatrick, Ryan Gray, Jess Ray, Nancy Jakubczyk, Darryl Craig, Maureen Smith

Minutes for last meeting were approved

- Julie and Jamison Prianos attended to discuss the Course Finder and Course Offerings.
 - Course Finder is based on Google search engine technology and has a 24-48 hour delay. The data is not live. Plan a basic schedule by seeing what is offered.
 - Used to promote summer session and provides students from other school access to what ISU is offering.
 - Course Offerings is live data from the mainframe, same data as registration. Better for planning at registration time as it shows actual openings in courses.
 - Must be logged into iCampus to use.
 - No way to merge both Course Finder and Course Offerings – may very well crash the system if they were merged and used. The registration promotion is far more complex with the checking of pre-reqs.
 - iCampus Beta will integrate Course Finder and Course Offerings onto one page.
 - Course Offerings can be added to OASIS, no new programming would be required.

- Discussed New Business
 - A new graduation application is available online in iCampus Beta
 - Student Teaching Certification: how can we get the information to students in a better way. Discussed an iCampus message or using LiveText.

Items to discuss at next meeting:

- Department forms used for advising (could everyone bring in copies of the forms they are currently using)

Next meeting will be scheduled for May. Jody will email out the date.

Meeting adjourned at 10:00 am
